About Us

Founded in 2002 by a group of development professionals, Agragami India's mission is to bring about sustainable change in the quality of life of the rural and urban poor. Programs address the causes of multi-dimensional poverty-lack of education, health, skill development and livelihood opportunities. Agragami ensures that interventions always reach the most vulnerable and focuses on youth as the starting point of societal change.

Over the last 24 years, Agragami has implemented various community-based programs and behavior change interventions in both rural and urban settings across health, education, skill development and livelihoods. The sub-thematic areas catered are maternal and child health, infant feeding and nutrition, adolescent reproductive and sexual health, adolescent anaemia and nutrition, adolescent development, family planning, community sanitation, pre-school and remedial education, skill development, livelihoods, income supplementation. Over these two decades, Agragami has implemented interventions in 22,500 villages of over 401 blocks of 27districts of Bihar, one low-income settlement of Delhi, and over 17 low-income settlements of NOIDA. Its current interventions are in Bihar, Uttar Pradesh, and Delhi. It has collaborated with Government, CSRs, NGOs, schools, institutions to ensure program synergy. Agragami has also built the capacity of NGOs in Bihar and

elsewhere to implement community-based health and family programs. The capacity building programs are conducted wherever it is needed in India.

Agragami India is accredited by The Credibility Alliance as an organization that fulfills all desirable norms of governance, accountability and system integrity.

Health

The Uday Project, NOIDA, Uttar Pradesh

Family planning, Maternal and child health

Under the umbrella of the HCL Uday initiative, Agragami India has continued its multi- dimensional intervention focusing on family planning, maternal-child health (MCH) intervention the under served migrant settlements of Noida. Operating across six high-density urban locations—Barola, Mamura, Hoshiarpur, Chhajarsi, Chotpur, and Bhalolpur—the project aims to improve health outcomes by promoting informed reproductive choices, reducing early and high fertility, and strengthening health-seeking behaviour in families.

Accomplishments during the period – April 2025 - March 2026:

I. Line listing:

We have completed the line listing in our selected areas of Barola, Mamura, Hoshiarpur, Chhajarsi Chotpur, Bhalolpur & Jalpura. During the line listing *in our project intervention locations a* total of 23,000 households were identified, out of which 15,734 households were open (accessible/responding), while 7,266 households were locked (not accessible during visits).The total population covered in these areas is 64,566 individuals, consisting of 33,947 males and 30,619 females.

ii. Routine Immunization (RI):

The team played a crucial role in engaging families, informing them about immunization services, and effective coordination between the field team and Auxiliary Nurse Midwives (ANMs) as a result, a total of 390 immunization sessions were conducted, reaching 8,607 children, including 4,377 boys and 4,330 girls. The initiative recorded strong vaccination coverage across key antigens: BCG (374 doses), Penta-1 (1,332), Penta-2 (1,276), Penta-3 (1,324), MR-1 (1,417), MR-2/DPT-B (1,538), and DPT-B2 (983).

Ensuring child health through awareness and uptake of routine immunization

iii. Reproductive and sexual health discussions for young married women (YMW):

Between April 2025 and March 2026, a total of 92 Young Married Women (YMW) were reached through home visits. Their responses provided important insights:

- 34 women (36.95 %) were already using contraceptive methods to delay their first pregnancy.
- 12 women (13.04 %) indicated that they would discuss the decision with their husbands before proceeding.

A group activity using a pearl game to help participants understand sex determination in a simple and interactive way.

IV. Family planning education for all pregnant & post-partum women:

During the reporting period, we conducted regular home visits to provide essential information and guidance to;

- Early registration for antenatal care
- Importance of institutional delivery
- Immediate and exclusive breast feeding
- Adoption of appropriate contraceptive methods within 45 days of delivery to ensure adequate birth spacing

During this period, we successfully sensitized 673 post-partum women within the first six months following delivery

V. Couples with one or more children and couples who do not want any more children:

During the period regular monthly home visits were conducted to engage women at the household level. A total of 12,393 women were reached, including 2,662 women with one child and 9,731 women with two or more children. The interventions primarily focused on women who already had children.

Explaining male sterilization (vasectomy) to a couple during a home visit

VI. Reproductive and sexual health training program:
During the period, training sessions conducted with adolescents, reaching a total of 1,740 participants. These sessions were designed to build awareness and understanding of key sexual and reproductive health issues among young people as physical and emotional changes, personal hygiene, nutrition, and responsible decision-making.

VII. Other supporting activities:

NCD Community Health Camp:
With the support of the Health Department, health screening and awareness camps were organized at PHC Barola, UHC Hoshiarpur, and SHC Chhijarsi. A total of 122 individuals were screened for blood pressure and diabetes, out of which 15 were identified with high blood pressure and 27 showed elevated blood sugar levels.

Training Family Planning and Sexual & Reproductive Health:
Agragami India, with the support of the HCL Foundation under the Uday Project in Noida, successfully conducted an interactive session on Family Planning and Sexual & Reproductive Health.A total of 143 participants attended the sessions conducted across the five partner organizations, including 78 females and 65 males.

World Breastfeed Week 1 – 7 August 2025
Theme- "Prioritize Breastfeeding: Create Sustainable Support Systems" :
The World Breastfeeding Week is observed globally from 1–7 August every year to raise awareness about the benefits of breastfeeding for both the baby and the mother.
The sessions were organized by Agragami India, with support from the Health Department and ICDS. Other sessions were attended by doctors, nurses, ANMs, and other Health Department personnel. Sessions were held in 10 different venues in which total 436 participants were participated.

World Immunization day: On the occasion of World Immunization Day, organized an awareness program at the Primary Health Centre (PHC), Barola.A total of 48 mothers and their children participated in the session, along with 4 ASHA workers, 2 ANMs, 1 staff nurse, and the MOIC.

A day to raise awareness, promote vaccination, and protect every child from vaccine-preventable diseases

Jan Seva Rath Camp: On 12 January 2026, organized a Jan Seva Rath Camp at Urban Primary Health Centre, Jalpura Sector-1, Greater Noida, Gautam Buddh Nagar, A total of 108 individuals benefited from the camp. Services included the issuance of 8 Ayushman Cards, 16 e-Shram Cards, 70 ABHA Cards, 10 PAN Cards, and 4 Voter ID Cards.

National Immunization day: On 16 March 2026, in collaboration with the Health Department, organized a National Immunization Day program at Primary Health Centre, Barola. The program witnessed the active participation of 130 women from the health facility and surrounding community, reflecting strong community engagement and interest in child health initiatives.

Sign Board installed at Health Facilities: Signboards displaying the health facility name and address have been installed at our three health facilities—two in Barola and one in Jalpura. This has improved visibility, helped community members easily locate the facilities, and strengthened access to healthcare services.

Health and Nutrition

The Creche Initiative Project, Mohanpur Block Gaya, Bihar

The Creche Initiative Project has been implemented to provide safe, nurturing, and child-friendly care services for children aged 7 months to 3 years. The initiative aims to ensure supplementary feeding, early childhood development, and facilitation of access to government entitlements and to identify growth faltering, underweight, and wasted children, refer them to a health facility and follow up. The program covers in 58 villages across five Panchayats in Dharhara, Siriyawan, Musaila, Bagula, and Gopalkeda-under Mohanpur Block in Gaya district, Bihar (as per Census 2011).

Accomplishments during the period – April 2025 - March 2026:

1. **Institutional and Office Setup:** To ensure systematic implementation, a formal agreement was signed on 21 July 2025. A dedicated bank account was opened for transparent financial management, and a fully functional project office was established at Itwan Bazar, Mohanpur, Gaya Ji.

2. **Staff Recruitment, Induction, and Deployment:** Project activities commenced in August 2025. Recruitment for the approved 10 staff positions during the month of July to September.All the staffs were conducted induction training's on the organizations policies and Creche project guidelines. An exposure visit & training of the creche staffs was held at Jamui district at "Samagra Seva" training venue from 17th to 19th September 2025 including 1 day field visit to Creche centers.

3. **Baseline Survey and Community Mapping:** Based on the Census 2011 data for 58 villages in Mohanpur Block, a baseline survey and child listing were conducted with the support of ASHA and Anganwadi workers to identify children within the target age group and assess their nutritional status, care needs, and gaps in service delivery.

4. **Community Participation and Stakeholder Engagement:** Meeting held with the district & Block officials of DM, DPO (ICDS) BDO, CDPO (ICDS) & BHM was carried out by the team to get the children list and to seek support from the ICDS & healt Gaya ji district.

Regular meetings were conducted with PRIs members (Zila Parisad member, Mukhiya, Sarpanch & Ward member), health workers, block officials, and community members to build trust and strengthen collaboration. A total of **33** Gram Sabha meetings were organized till 31st March, through which **66** caregivers were selected 2 from each village.h department,

5. Capacity Building and Training: Training programs for project staff & Creche caregivers were conducted by the Agragami India and on project guidelines, operational systems, monitoring, safety, and documentation. The training module covered childcare, nutrition, hygiene, safety, play-based learning, record management, and emergency response. This strengthened caregivers' confidence, skills, and service delivery capacity.

6. Creche Center Establishment and Operations: The first four creche centers in different locations were inaugurated on 15th December 2025. In one of the centers in Yaduachak Creche, **Mrs. Jyoti Manjhi,** MLA of Barachatti Assembly Constituency inaugurated with the support from local community leaders. Till the reporting period **24** Creche Centers are operational and have been inaugurated by local leaders including PRIs members with participation of local communities, women and mothers. **614**children listed and enrolled **497** (Male-245, Female-252)

7. MIS and Monitoring System: Project 'Management Information System' (MIS), mobile based **'SHISHU GHAR'** app was introduced and in placed to maintain records related to child attendance, health status, nutritional progress, and center operations. This enables us to track and strengthened routine monitoring, reporting, and data-based decision-making.

8. Mother's Committee and Community Monitoring: Monthly Mother's Committee meetings were conducted across the **24 operational creche centers.** These meetings focused on nutrition, hygiene, breast feeding, complementary feeding, child care, and crèche center management. A total of **24 Mother's Committee meetings** had been organized.

9. Assessment of Program Progress: The Program Lead and Team from Azim Premji Foundation have been reviewing through regular visit to the project sites to review the progress from time to time. Feedback from were discussed during the team weekly/monthly meeting for taking forward in improving the progress.

10. Monthly Review Meeting and Planning: The project team has monthly review and planning meeting with crèche caregivers to review the progress and way forward to achieve the progress. These sessions focus on enhancing caregivers' knowledge and skills in areas such as child care, balanced nutrition, hygiene management, early childhood mental & physical development, play-based learning methods, safety protocols, and emergency response.

Self-Defence

ALORVIE Project: Self-defence training for women and girls

1. **Project Overview:**

The **Self-Defence Project**, launched by Agragami India in April 2023, aims to equip adolescent schoolgirls in Noida and Delhi with practical self-defence skills while building confidence, leadership and resilience. Through a **train-the-trainer model**, selected schoolgirls are trained as peer trainers who subsequently train other girls and women in schools and communities. The three-year project aims to reach **7,500 girls and women**girls and women through peer-led interventions, thereby promoting empowerment, leadership, and safety among adolescent girls in Noida and Delhi.

Year 3 Achievements (April 2025–May 2026)

During Year 3, **24 new trainers** were trained—12 from Government Senior Secondary School, Madanpur Khadar, Delhi, and 12 from GGIC Noida. **13 trainers remained actively engaged**, conducting **79 training sessions** and reaching **3,771 girls**.

Overall Project Achievements

During the three years of the project, **36 trainers** have been trained, of whom **17 remained actively involved**. They conducted **168 self-defence workshops across 39 schools**, reaching **7,807 girls.**

The programme strengthened girls' **awareness of personal safety, alertness, confidence, assertiveness, and preparedness**, while providing practical skills and techniques for self-protection.

The trainers succeeded in imparting to their trainees:

- Enhanced awareness of personal safety and of one's personal space
- alertness preparedness to protect oneself,
- the confidence to use one's voice to both intimidate those who threaten one's safety and draw the attention of others to the potential threat posed to the person.
- knowledge of practical and effective physical techniques that should be used for self-protection and defence.

Livelihood

Agragami India Khushali Livelihood Project, Bodhgaya

Program Overview:

The Khushali Project, a comprehensive livelihoods initiative by Agragami India, aims to enhance the quality of life for impoverished communities by supplementing their incomes and development,support and promotion of a cadre of motivated women from the village and train them as para-veterinarians*called Pashu Sakhis where they* play a critical role in strengthening the livestock eco-system by providing doorstep animal healthcare services. They are trained, supported and supervised by Agragami Livelihood project staff.

Linkages have been established for them so that they can access expert assistance by phone from government veterinarians at the block and district level.

An important input to the goat rearing program has been the introduction of creep feed, liver tonic and a digestive aid prepared and sold by *Pashu Sakhis* to families that rear goats.

The goat and pig rearing components of the project have generated more supplementary income. Better access to immunization and other veterinary services has led to declining mortality of kids – from 21.3% in 2020-2021 to 2.15% in 2025-2026. Families are now more confident about the survival of their animals and the profitability of goat rearing. The average number of goats reared per family has increased from 3.01 in 2020-2021 to 4.25 in 2025-2026.

In November 2025, with a grant from IFPD Geneva, the Khushali intervention was expanded to include 22 new villages, increasing project coverage to 35 villages in which 2450 small-holder, scheduled and backward caste families are served. The new villages receive para veterinary services from 7 apprentices *Pashu Sakhis*.

Overall Results:

- Total household covered during the 2450 in 35 villages
- Total No of Goats owned 6852
- De worming services were delivered to 3479, goats across35 villages .
- 1312 goats from 650 house holds received treatment through Pashu Sakhis, supported by telemedicine consultations with veterinary experts.
- A total of 392 kg of Dana Mishran (fodder mix) was distributed to improve breeding, fertility, and milk production in goats.
- 1298 goats in 2450 households were vaccinated against PPR, with zero deaths reported among vaccinated animals.
- 1130 kilos of creep feed consumed during the year.
- 76 Bakri Palak Pathsala sessions were conducted during the year.
- 25.5% of families earned less than ₹6000, 12% ₹ 6000 –₹12,000, while 37% earned ₹ 12000- ₹18,000 and 25.5% earned more than ₹18000 annually showing a tremendous benefits in the communities that we served.

Skill Development

The Bodhgaya Hotel School (TBHS), Bodhgaya, Bihar

1. About the Program

The Bodhgaya Hotel School (TBHS), a social project of Agragami India, continues to provide a transformative platform for underprivileged youth by equipping them with professional skills in the hospitality sector. Through a combination of practical training and structured classroom learning, the program focuses on developing industry-ready candidates in areas such as Food Production, Front Office, Food & Beverage Service, and Housekeeping. The initiative aims to create sustainable livelihood opportunities and bridge the gap between education and employment by ensuring that students are prepared to meet industry standards.

Accomplishment for the year 2025-26:**Student batch 7 of 2025–2026**

Student Development

In this eight month, the sixteen students of this batch were actively engaged in practical learning both at TBHS and in Outdoor Catering (ODC) activities, which played a crucial role in enhancing their hands-on skills. These ODC engagements allowed students to experience real-time service delivery, teamwork, customer interaction, and event-based hospitality

operations. Such exposure significantly strengthened their confidence, adaptability, and readiness for the professional workplace. Students demonstrated steady progress in technical competencies, discipline, and communication skills. Special emphasis has been placed on improving English communication, grooming and professional behavior to ensure readiness for the hospitality industry. Despite coming from challenging backgrounds, students have shown resilience and commitment.

'TBHS students engage with leaders to strengthen Bihars tourism future

2. The Bodhgaya Hotel School students participated in the National Youth Dialogue on Spiritual Tourism. Ms. Indrakhi Kumari and Mr. Abhishek Giri took part in the "New Bharat Tourism Development and Connection" program, held from 9–11 March 2026 at Nalanda Open University, Nalanda, Bihar.The dialogue aimed to bring together youth leaders, policymakers, and cultural ambassadors from across India.

Through their participation, the students gained valuable insights into promoting the tourism industry through youth involvement, serving as role models in advancing the sector.They also had the opportunity to interact with various resource persons and stakeholders, and to share their ideas on strengthening Bihar's tourism under the framework of Viksit Bharat 2047.

3. Industrial Training

All students batch 7 of 2025–2026 have successfully completed their eight months of study and work at TBHS and fifteen of them have proceeded for industrial training in different hospitality establishments in Sayaji Indore, Ramada Bodhgaya, The Altruist Hyderabad, Fern Hotel Gujarat , Marriott Ranchi and across India. Here they will undergo practical training for four to six months, will receive stipend and additional benefits such as meals and accommodation. Most of the hotels where the students have been placed have strong potential for full-time employment based on performance during training.

4. Partner Organizations

TBHS owes much to its donors and partner organizations. International Foundation for Population and Development (IFPD) and EHLSmile, our founder donors, continued their strong support. Chartered Hotels Pvt Ltd, Taneja Aerospace and Aviation Limited, Alcobrew Distilleries India Limited and several individuals who wish to remain anonymous, provided much needed financial support this year. This support has enabled TBHS to ensure quality training, repair infrastructure, and maintain high placement outcomes, while taking care of student's welfare.TBHS works closely with partner NGOs such as Udayan Care and Nari Gunjan, who sponsor needy students from disadvantaged communities. These partnerships remain vital in identifying beneficiaries and enabling them to access skill development opportunities that lead to meaningful employment.

Agragami India : Early childhood and remedial education

Agragami India's education program in the low-income settlement of Madanpur Khadar, Delhi, provides critical academic support to children from families with low literacy backgrounds. Initiated at the request of the community, our program offers two core components: Preschool classes (started in March 2016) to prepare young children for formal education, and Remedial classes (started in July 2014) to support primary school students who are at risk of falling behind. By creating a nurturing and effective learning environment, we aim to ensure every child has the opportunity to succeed in their academic journey and beyond.

Pre school Program: Preparing for Success

Our pre school program creates a vital learning bridge for children aged three to five, many of whom come from homes where parents are uneducated. In our care for three hours a day, these children learn through play, acquire crucial social skills, and are prepared academically and emotionally for admission in to primary school. This year, we have seen significant overall development in our students, with several being successfully mainstreamed into formal schools.

Remedial Primary Education: Preventing Dropouts

For primary school students who struggle to keep up with their schoolwork, our remedial classes are a lifeline. The program focuses on strengthening core reading, writing, and numeracy skills upto a Class 5 level. By providing targeted assistance, we help these children catch up with their peers, build their confidence, and, most importantly, prevent them from dropping out of school. Students have consistently shown marked improvement in various subjects, demonstrating the program's effectiveness.

Highlights of the Year: A Test ament to Trust and Quality

Thisyear,ourprogramhascontinuedtobeacornerstoneofthecommunity,buildingastrong reputation for fostering the all-round development of children.

Consistent Enrollment: We have maintained a steady presence in the community, serving an average of 30 students in our preschool section and 30 (*Please check the figures*) students in our remedial classes across our morning and afternoon batches. During the reporting period, 51 children were enrolled in preschool, of whom 33 continued their participation. In the remedial education programme, 62 children were enrolled, of whom 24 continued attending the classes.

A Trusted Institution: A significant indicator of our program's quality and impact is the trend of students being mainstreamed, parents overall sharing their satisfaction, students showing improvement in education and children being dropped also return tous. Often, parents whoop for seemingly less expensive alter natives find that their children's development stalls. Some of them subsequently re-enroll their children at Agragami, validating the effectiveness of our teaching methods and the dedication of our staff.

Engaging Learning Methods: Our preschool curriculum is centered around a "play- way" methodology. We utilize a variety of engaging tools, videos, and interactive activities to teach foundational concepts, like the Hindi and English alphabets and counting, making learning a joyful experience.

Strong Parent-Teacher Collaboration: Our parent-teacher meeting sare provided a vital platform for open dialogue between parents and teachers, fostering a collaborative approach to supporting each child's learning behaviour and overall well being.

Adolescent Program

Tarakki Project, Basadhi Panchayat Bodhgaya Block

1. Project Overview:

The **Tarakki Project** is a three-year adolescent development initiative implemented in seven villages of Basadhi Panchayat, Bodhgaya Block, Bihar. The project aims to empower **1,686 adolescents** (705 aged 12–14 and 981 aged 15–19) by addressing challenges related to health, education, life skills, and career opportunities. Through adolescent clubs, structured training, peer leadership, and the development of local Club Facilitators, the project strengthens adolescents' confidence, leadership, and decision-making abilities. It also promotes youth-led social action and community engagement to create a supportive environment for adolescents. By strengthening collective action and improving the responsiveness of local systems, the project seeks to enable adolescents to make informed life choices and achieve sustainable positive outcomes.

2. Overall Results

Creating Safe Spaces Through Adolescent Clubs: One of the Tarakki Project's key achievements has been the successful formation of 75 adolescent clubs across seven villages, comprising 33 junior clubs (ages 12–14) and 42 senior clubs (ages 15–19), providing structured platforms for learning, leadership, and collective action.

Strengthening Adolescent Health, Well-being, and Leadership: Improving adolescents' awareness and access to health services remained a key focus of the Tarakki Project. A total of 705 adolescents aged 12–14 years were trained on puberty, menstruation, hygiene, nutrition, anaemia prevention, emotional well-being, and decision-making through 37 batches.

Additionally, 86 adolescents aged 15–19 years participated in advanced training on adolescent reproductive and sexual health.

The Tarakki Project strengthened adolescents' access to health services through close collaboration with the government health system. Exposure visits to Adolescent Friendly Health Clinics (AFHCs) and Primary Health

Centres (PHCs) helped adolescents understand available health services and their entitlements, while peer leaders successfully advocated for regular Td vaccination and improved Iron and Folic Acid (IFA) tablet distribution. As a result, 255 adolescents (174 girls and 81 boys) visited AFHCs, and 214 adolescents (203 girls and 11 boys) received Td vaccination. In Narkatiya village, adolescent girls established community-managed sanitary pad banks, improving access to menstrual hygiene products and demonstrating strong leadership and collective action.

- **National Youth Day** was celebrated on 12 January 2026 in Basadhi and Bataspur villages, where 128 adolescents participated in a workshop and awareness rally inspired by the teachings of Swami Vivekananda. The programme encouraged self-confidence, character building, regular school attendance, and goal-oriented living, followed by a community rally promoting youth empowerment and education.

- **National Girl Child Day** was celebrated on 24 January 2026, at the Silaunja Project Office with the participation of adolescents, peer leaders, elected representatives, teachers, frontline workers, and community members. The event focused on girl child empowerment,

gender equality, prevention of child marriage and violence against women, and the importance of girls' education. Adolescent club members presented an impactful street play, while girls shared inspiring testimonies on how the project had enhanced their confidence, leadership, and awareness of their rights. Outstanding performers were recognized with awards.

- Agragami India also celebrated its **24th Foundation Day** on 19 February 2026, bringing together 140 participants, including adolescents, parents, teachers, and community leaders. Through speeches, cultural performances, songs, dances, and street plays, adolescents demonstrated their talents while raising awareness on education, gender equality, and social responsibility. Celebrated under the theme "Growing Together—Learning, Leading & Inspiring," these events provided meaningful platforms for youth expression, strengthened community engagement, and reinforced the Tarakki Project's contribution to building confident, informed, and socially responsible adolescents.
